

ERROR FOUND

■ Error Type:
Syntax Error

■ Error Explanation:
The code contains a non-ASCII character () which is not allowed in Python syntax.

■ Correct Code:

```
```python
a = 12
b = 12
c = a + b
print(c)
```
```

■ Suggestions:
Consider adding comments to explain the purpose of the code, and use descriptive variable names.

■ Code Quality Score:
6/10
